

# How to View Your Dozuki Site in Multiple Languages

This guide demonstrates how to view your Dozuki site in multiple languages.

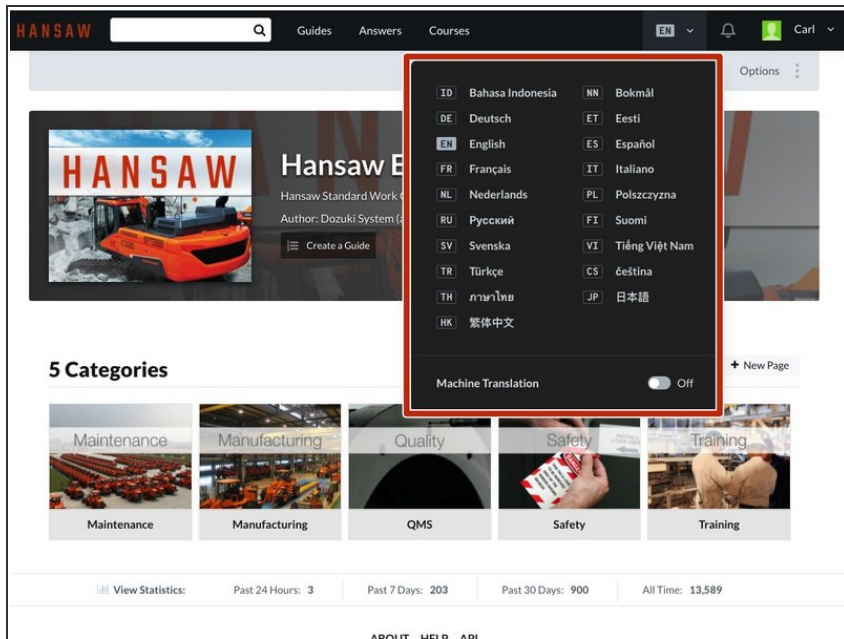

Written By: Dozuki System

## INTRODUCTION

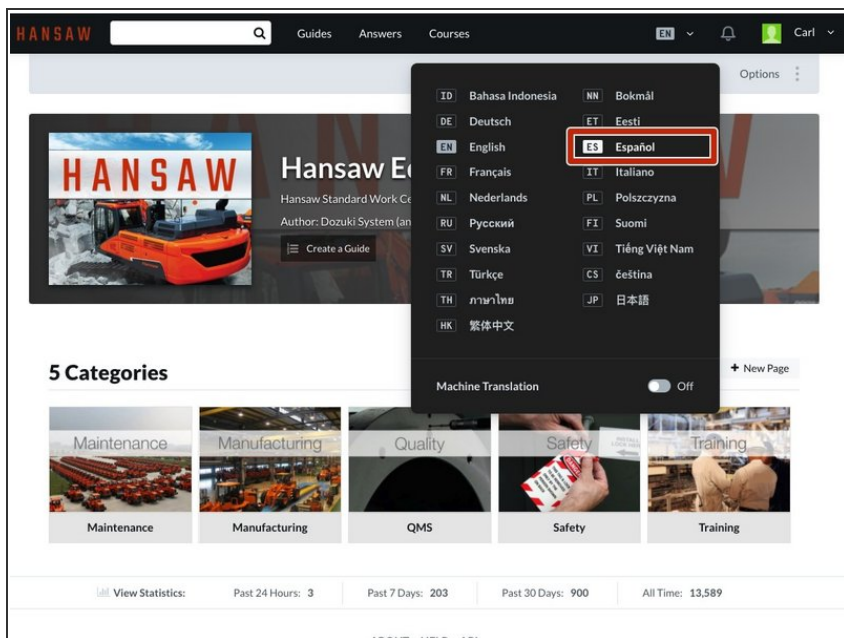

This guide demonstrates how to view your Dozuki site in multiple languages.

## Step 1 — How to View Your Dozuki Site in Multiple Languages

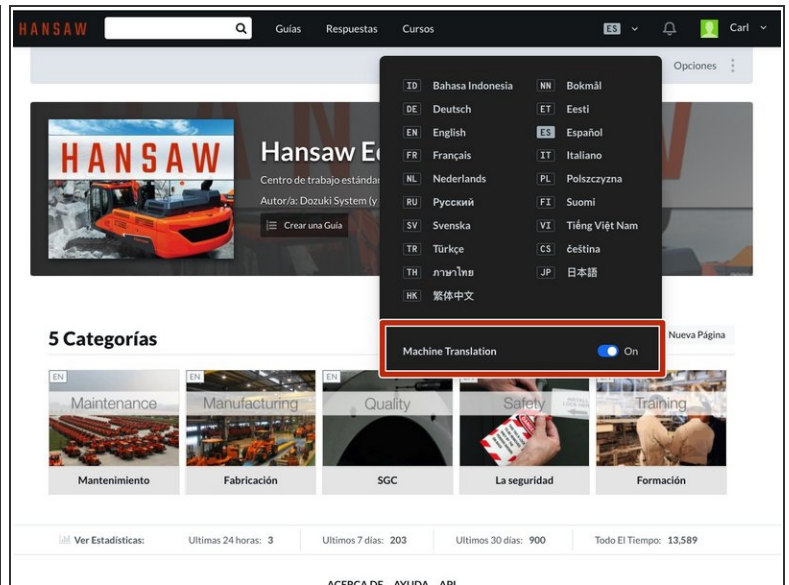

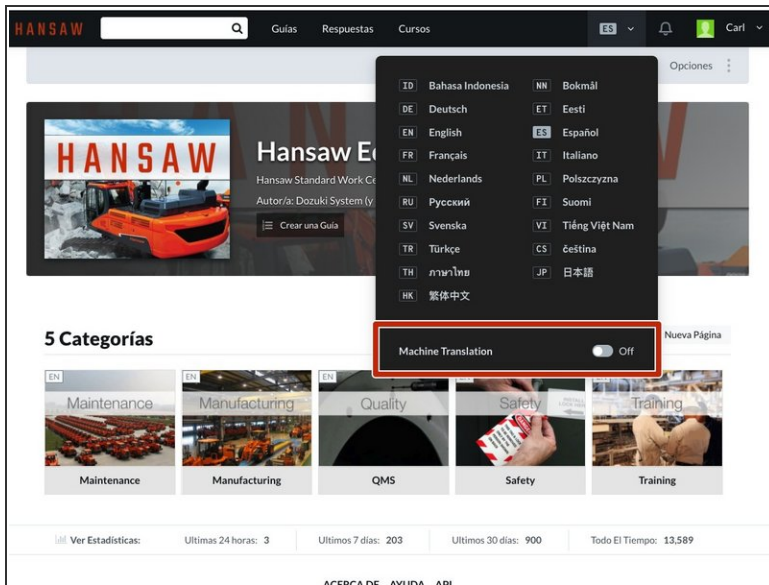

- Click to expand a **Language Menu** in the header.
- ① This is a list of languages your site can be translated to.

## Step 2

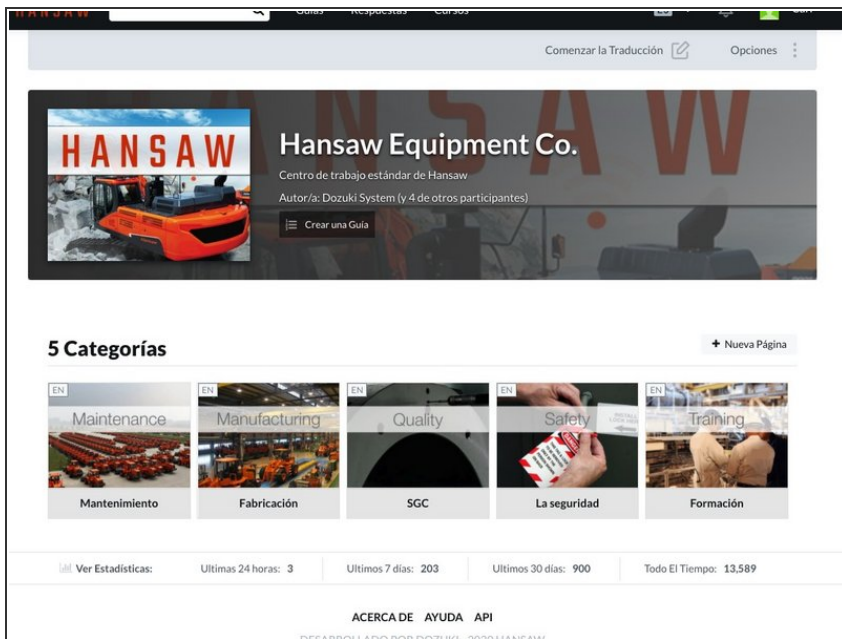

- Select your desired language.
- ① For the purpose of this example, the site will be translated into Spanish.

## Step 3

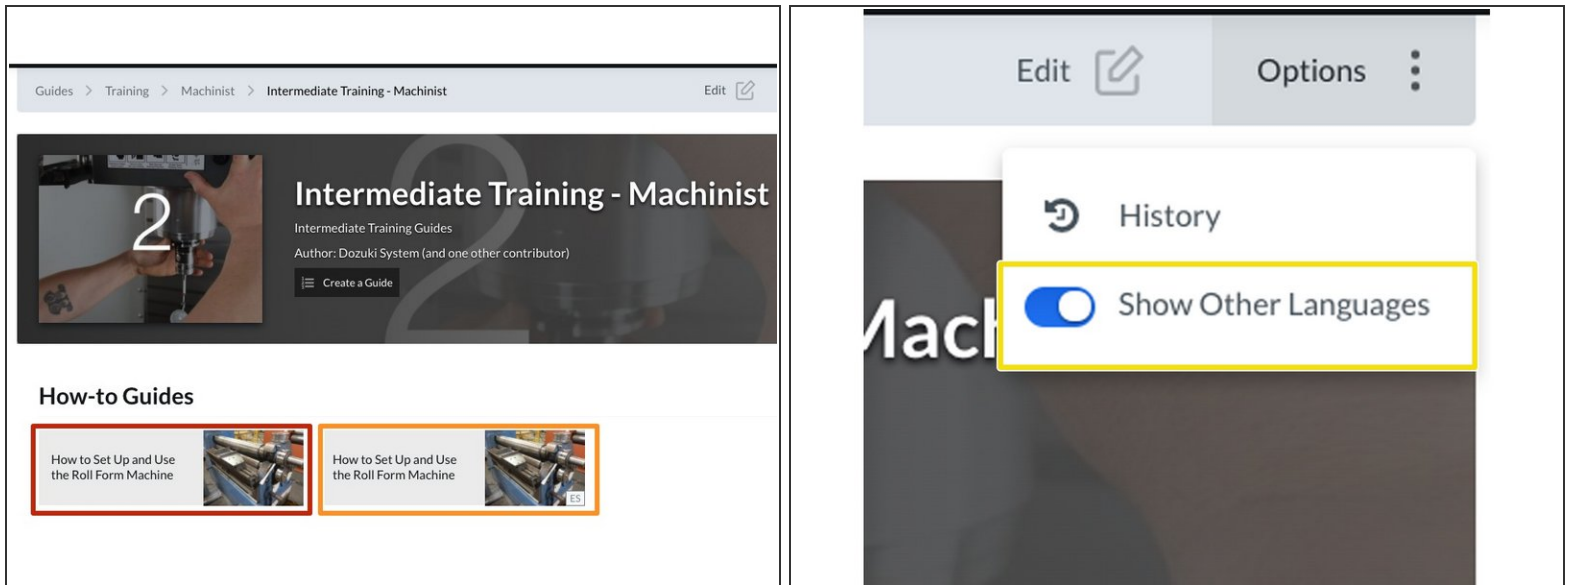

- Toggle On the **Machine Translation** checkbox at the bottom of the language dropdown.

## Step 4

- The site interface is now in the selected language.
- ① This applies to the interface language on the entire site.

## Step 5 — Translation Effects on Guides

- When you visit your category pages, the guides that are written in the selected language will appear in the guide section first.
- If a guide was not originally written or manually translated into the selected language, it will follow all guides written in the selected Site Language under the How-To Guides.
- If you do not want to view guides written in the selected language, you can hide them by toggling the **Show Other Languages** switch located in Options from the subheader.
