## How to Resize an Image

This guide demonstrates how to resize an image.

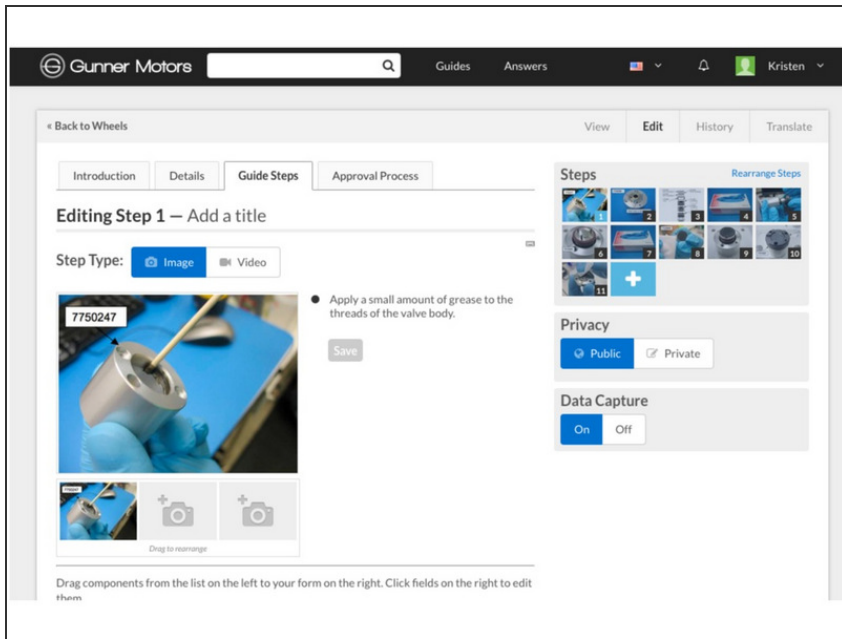

Written By: Dozuki System

## **INTRODUCTION**

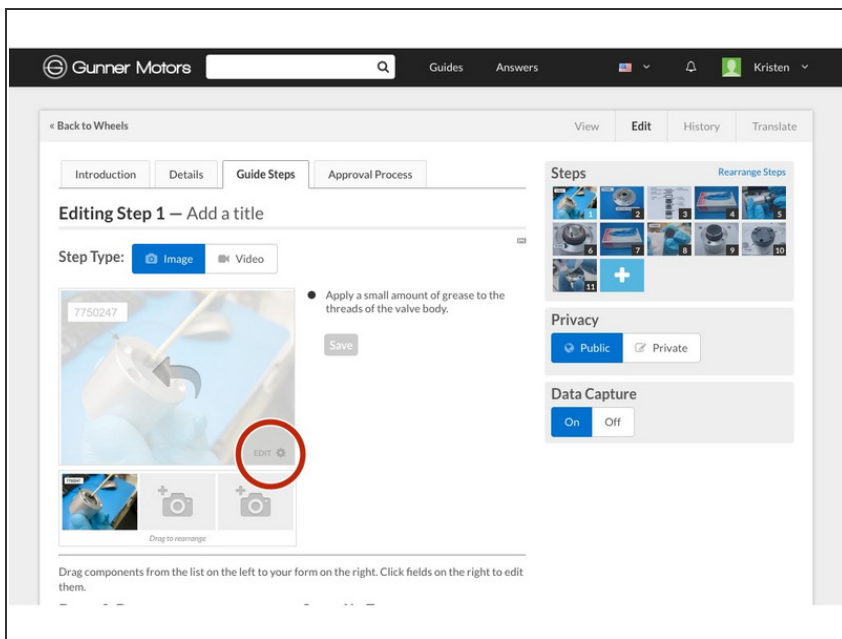

This guide demonstrates how to resize an image.

## Step 1 — How to Resize an Image

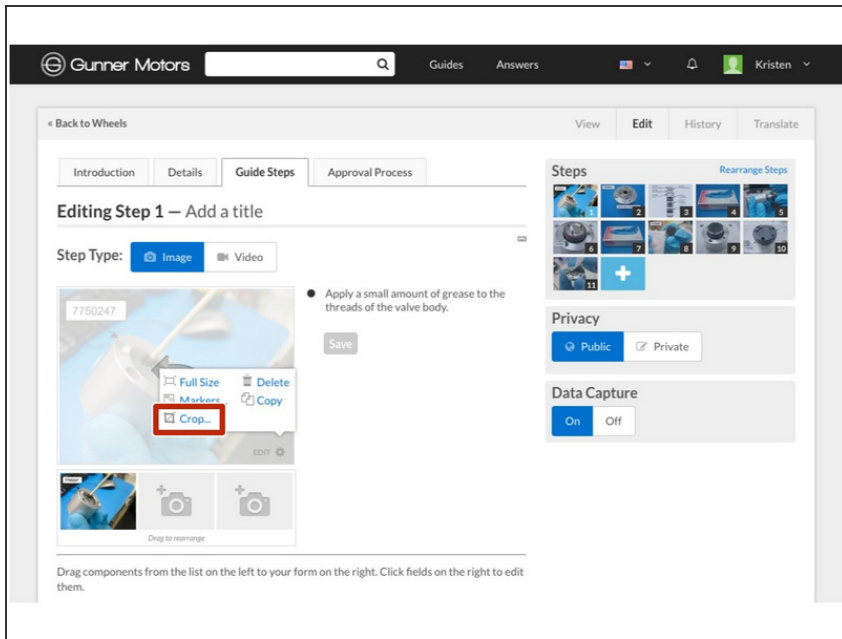

- Navigate to the step that contains the photo you would like to crop.

## Step 2

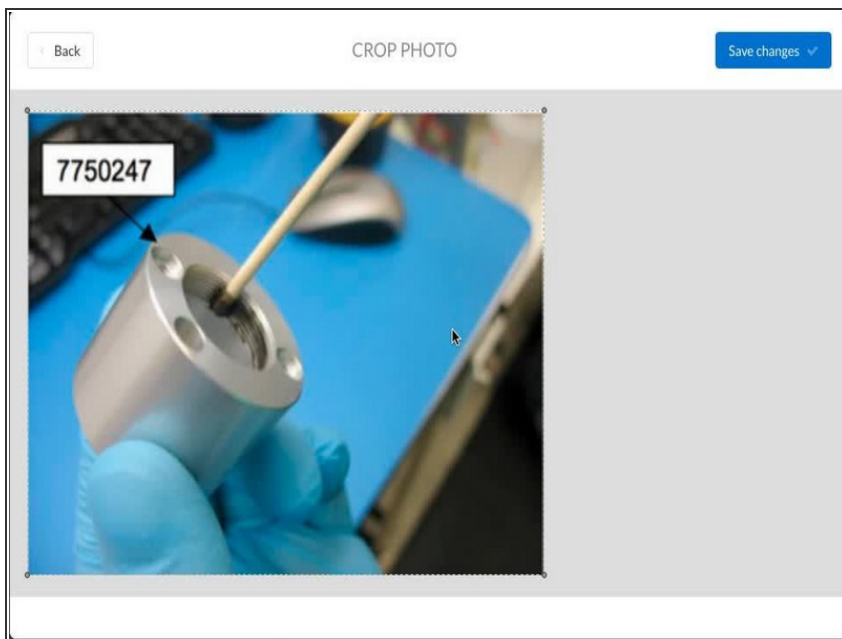

- Press the gear icon at the bottom right corner of the image you want to edit.

## Step 3

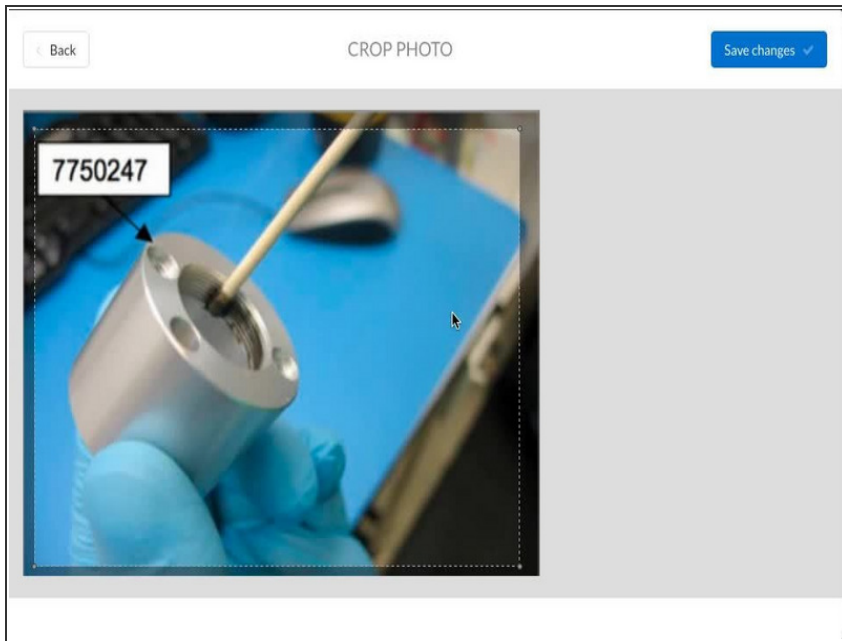

- A list of options should now appear.
- Select **Crop**.

## Step 4

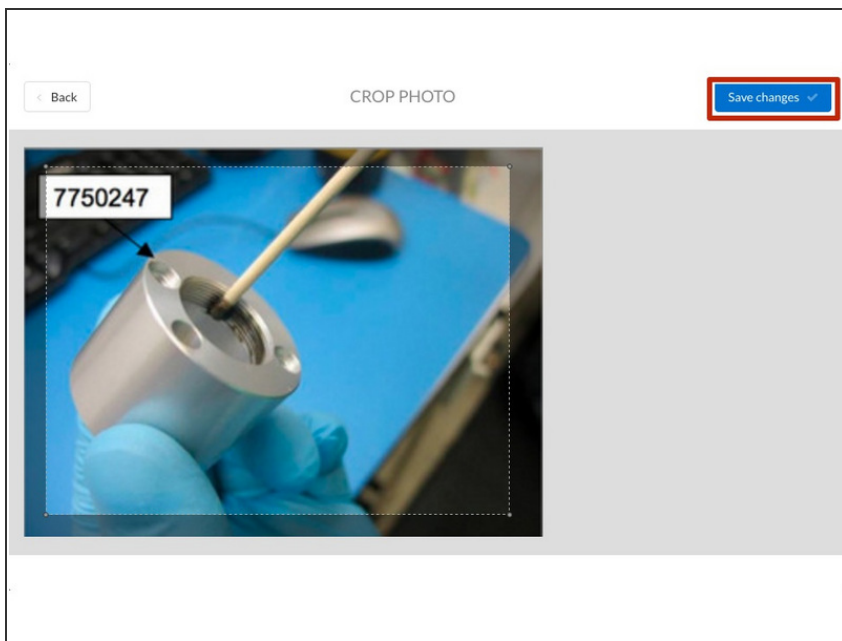

- Locate the grey dots in the corner of the pictures.
- **Click** and **Drag** the grey circle to resize the picture.

## Step 5

- If you want to move what part of the picture will be cropped, **Click** and **Drag** any area on the light grey outline of the cropped area.

## Step 6

- When done moving the cropped space, press **Save**.

To reassemble your device, follow these instructions in reverse order.
