

How to Resize an Image

This guide demonstrates how to resize an image.

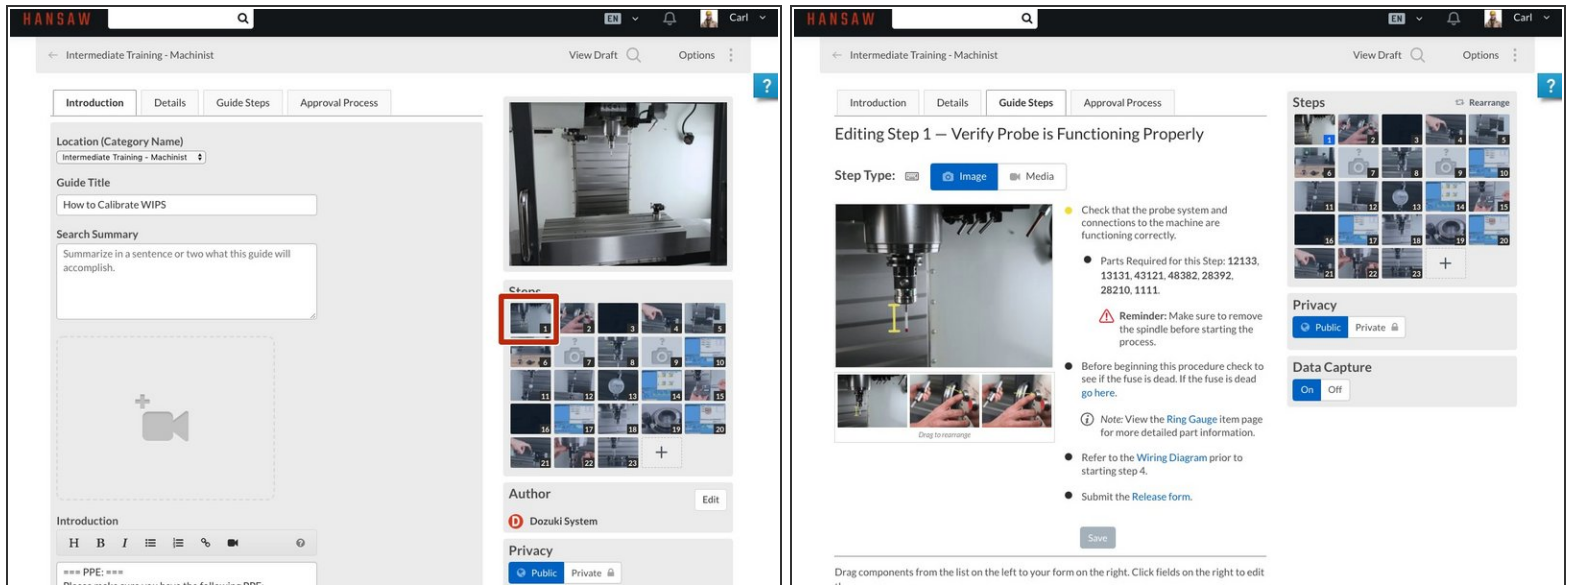

Written By: Dozuki System

INTRODUCTION

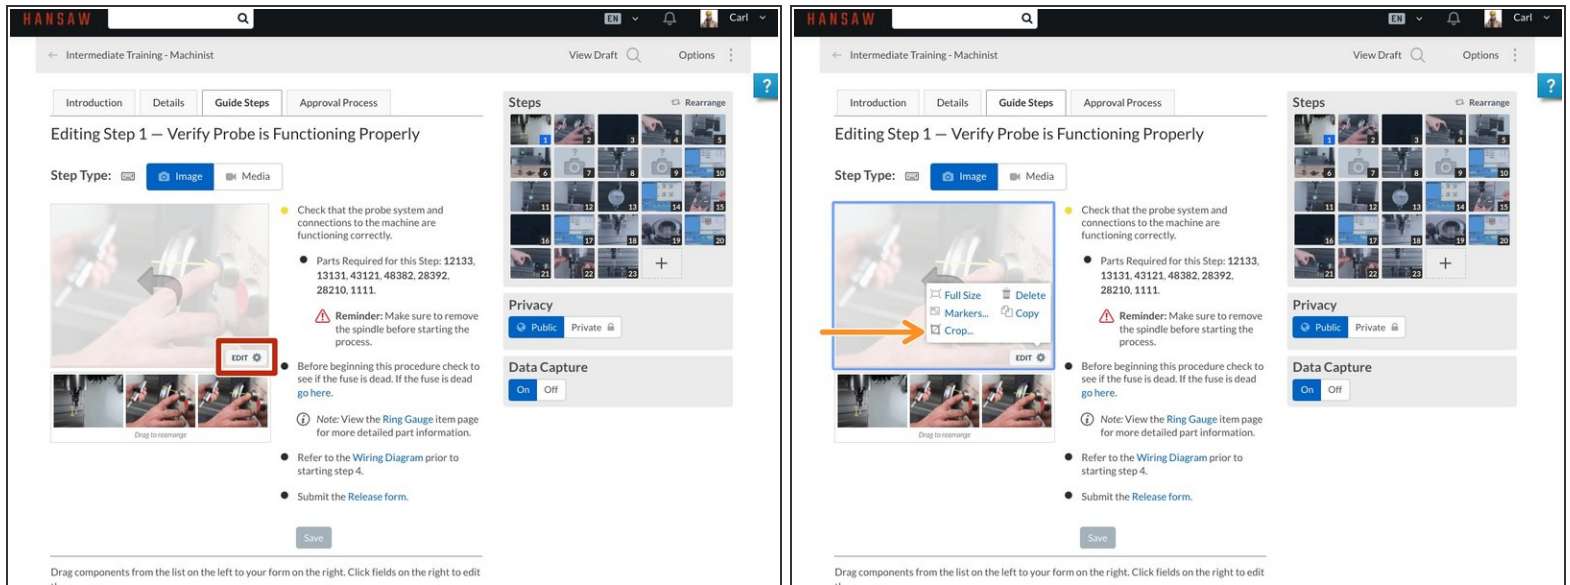

This guide demonstrates how to resize an image.

Step 1 — How to Resize an Image

- From the Edit Screen:
 - Click on the step thumbnail that contains the photo you want to crop.

Step 2

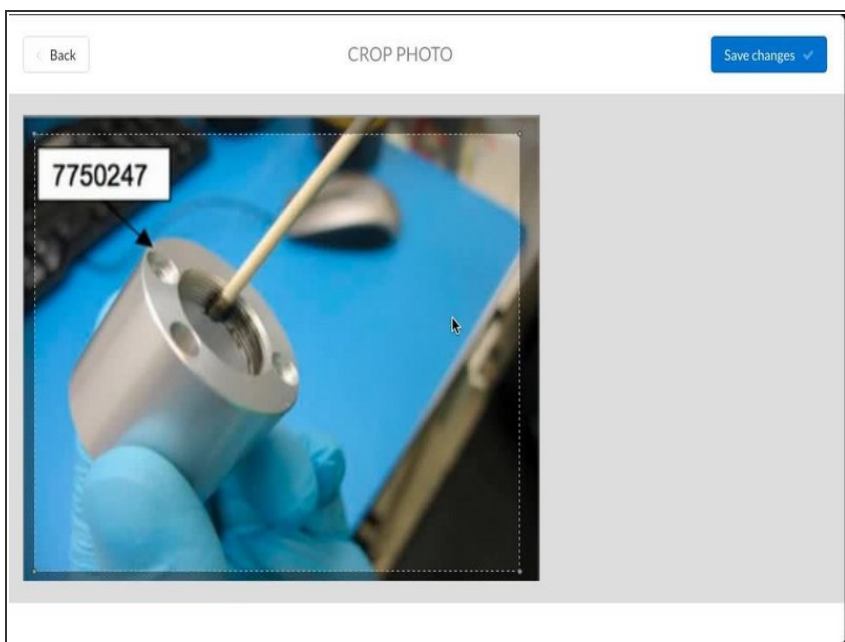

- Hover over the image you want to edit and click on the **Edit Gear** button that appears in the bottom corner of the image.
 - A list of options appears.
- Select **Crop**.

Step 3

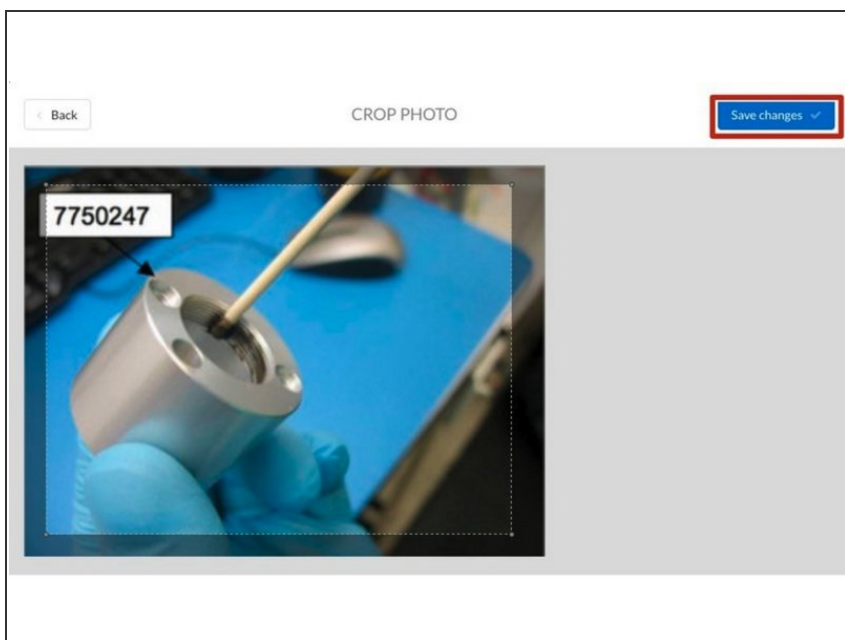

- Locate the cropping handles, the grey dots in the corners, of the pictures.
- **Click** and drag the cropping handles to resize the picture.

Step 4

- If you want to move the part of the picture that will be cropped, **Click** and **Drag** any area on the light grey outline of the cropped area, and you can move the cropped area around.

Step 5

- When you have positioned the crop area to the desired location, click **Save**.

To reassemble your device, follow these instructions in reverse order.
