

## How to Add Custom CSS

This guide demonstrates how to add custom CSS.

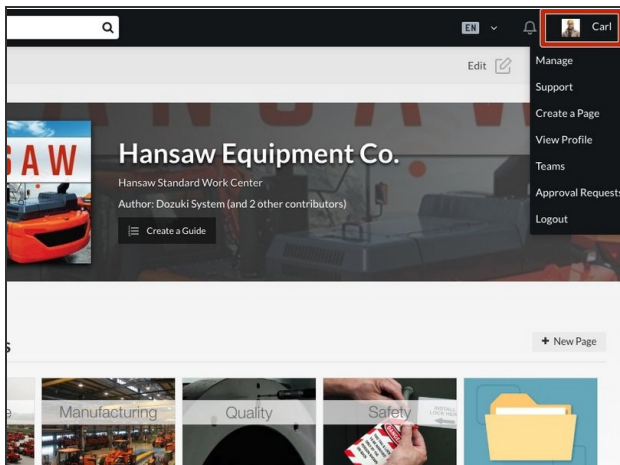

Written By: Dozuki System

# INTRODUCTION

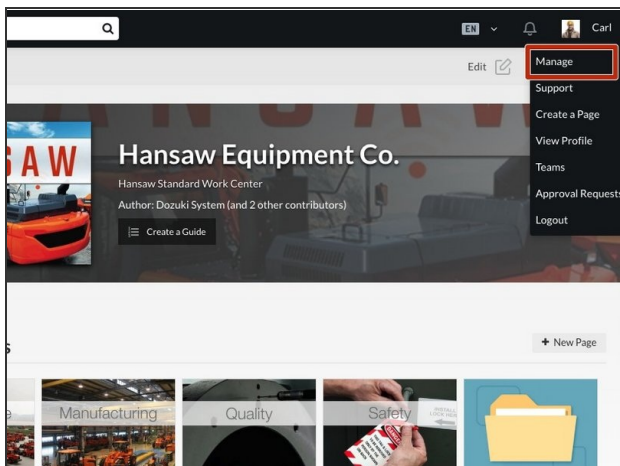

This guide demonstrates how to add custom CSS.

## Step 1 — How to Add Custom CSS

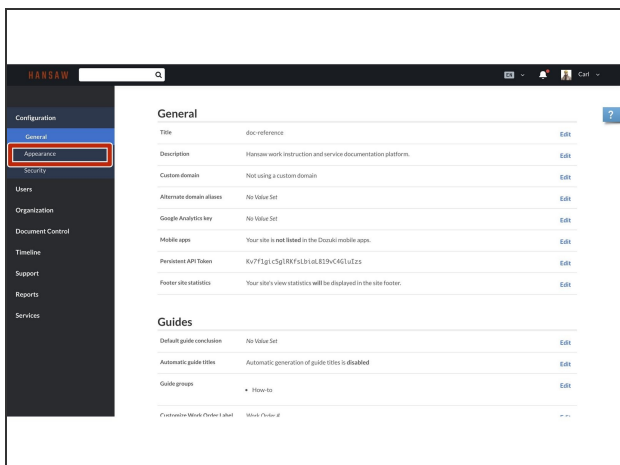

- Click on the user menu on the right of the site header to expand a drop-down menu.

## Step 2

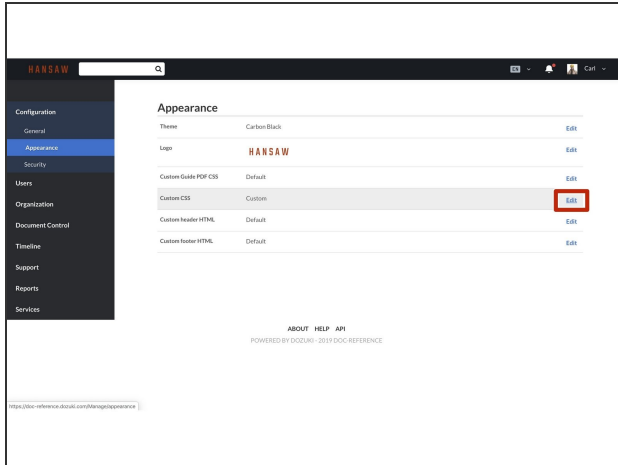

- Select **Manage** from the drop-down menu.

## Step 3

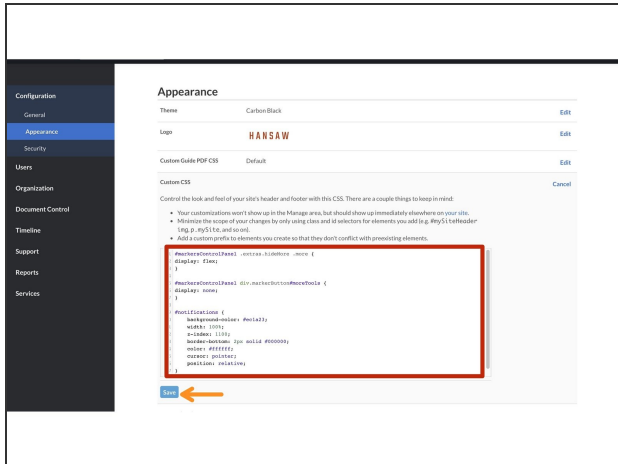

- Click the **Appearance** subsection, located under the **Configuration** tab on the side bar.

## Step 4

- Click on the **Edit** button in the **Custom CSS** row.

## Step 5

- Enter your custom CSS into the text box.
- Click **Save** when completed.

To reassemble your device, follow these instructions in reverse order.
