

How to Embed Media in Guide Steps

This guide demonstrates how to embed images and videos in your Guide Steps using your Media Manager.

Written By: Dozuki System

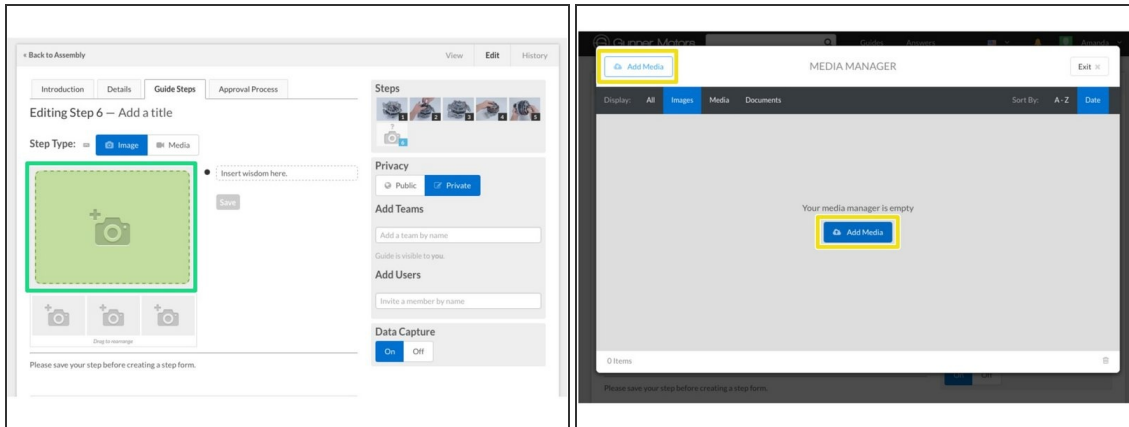

INTRODUCTION

This guide demonstrates how to embed images and videos in your Guide Steps using your Media Manager.

Now, it's easier than ever to add dynamic media to your guides using the media embed tool within the Media Manager.

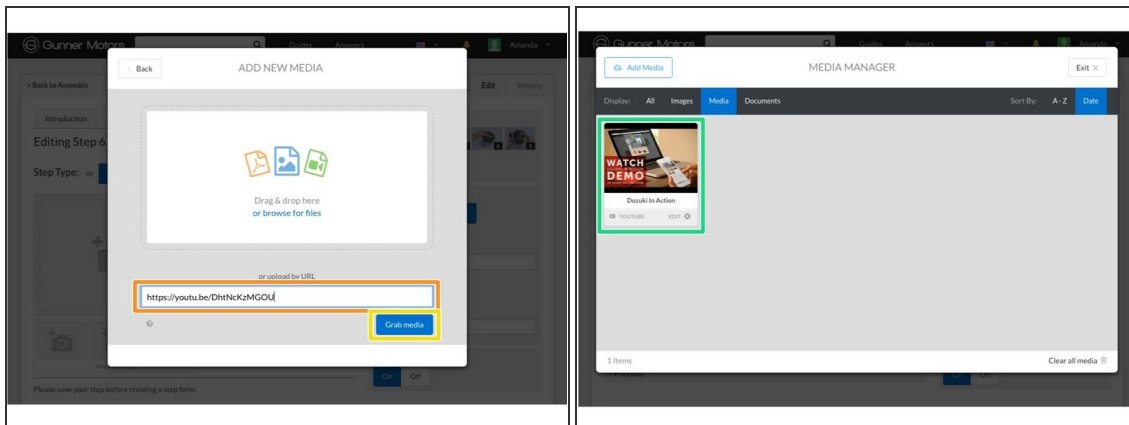

Check out the [Dozuki Integrations Page](#) for more information!

Step 1 — How to Embed Media in Guide Steps

- Open the Media Manager from within a guide by clicking on the image or video placeholder.
- Click the **Add Media** button.

Step 2

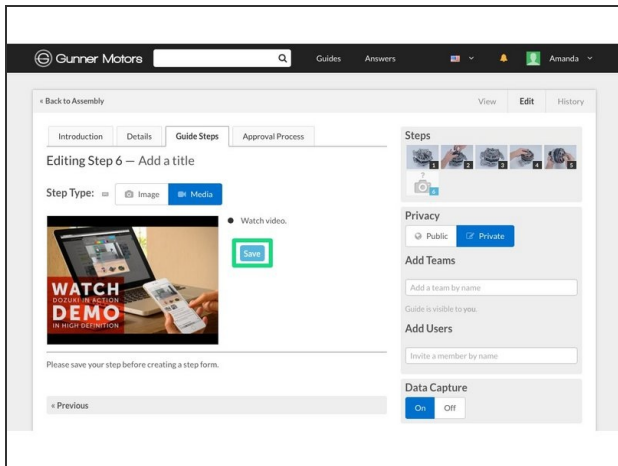

- Copy the URL from the media source.
- Paste URL in the **Upload URL** field below the Drag & Drop field.
 - ⓘ This example uses a YouTube video.
- Click the **Grab media** button.
- View your uploaded image or video in the Media Manager, then click on it to add it to your Guide Step.

Step 3

- Dozuki also supports many [standard integrations](#).
- For example, this step contains a code snippet called a Gist.
- Here's a link to [this Gist's source](#).

Step 4

- Your embedded media will be added to your Guide Step.
- Add your bullet points, then click **Save**.

That's it!
