

Peel the Protective Film

Peel the Protective Film

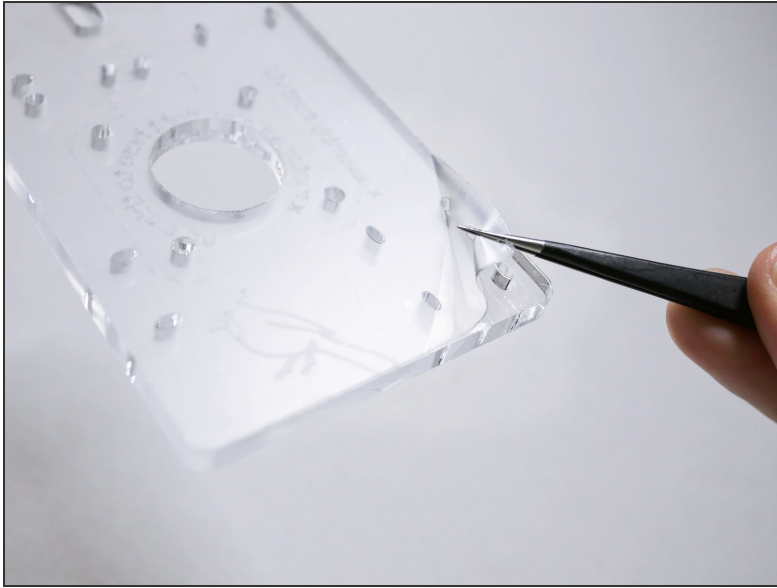

INTRODUCTION

The acrylic pieces all come with a plastic protective film. This is so they they do not scratch in transport.

The build guides presume you have already PEELED this protective film.

You can either peel all the acrylic pieces at the beginning of your build, or peel the pieces as you come to need them. Choices...

Step 1 — Peel the Protective Film

- Tweezers are great for lifting a corner of the protective film.
- You can either peel all the acrylic pieces at the beginning of your build, or peel the pieces as you come to need them.
