# Install Exemplify on macOS

## INTRODUCTION

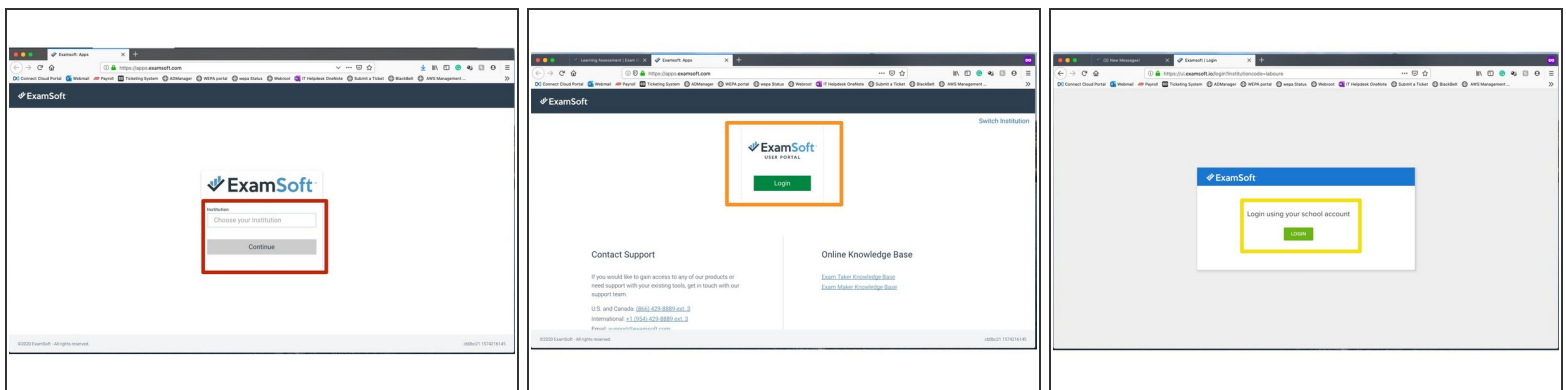

Please first ensure that your macOS device meets [Exemplify's minimum system requirements](#).

## Step 1 — Sign in on Examssoft.com

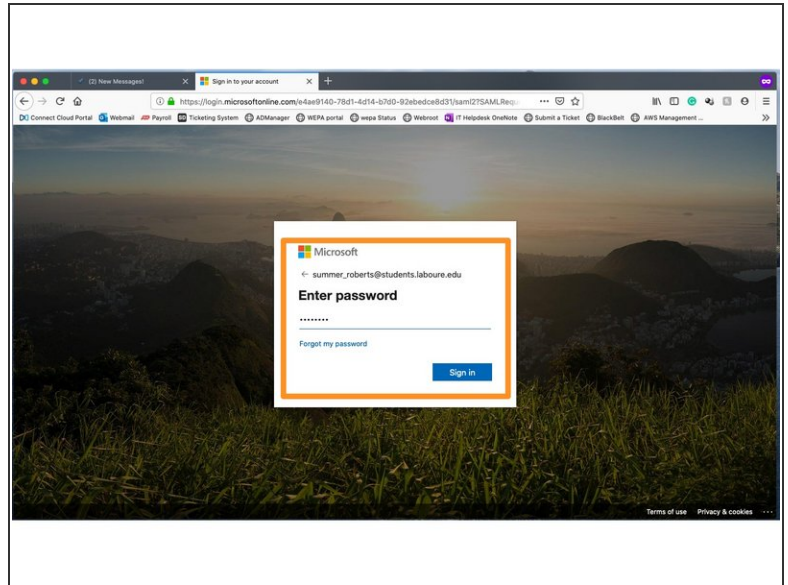

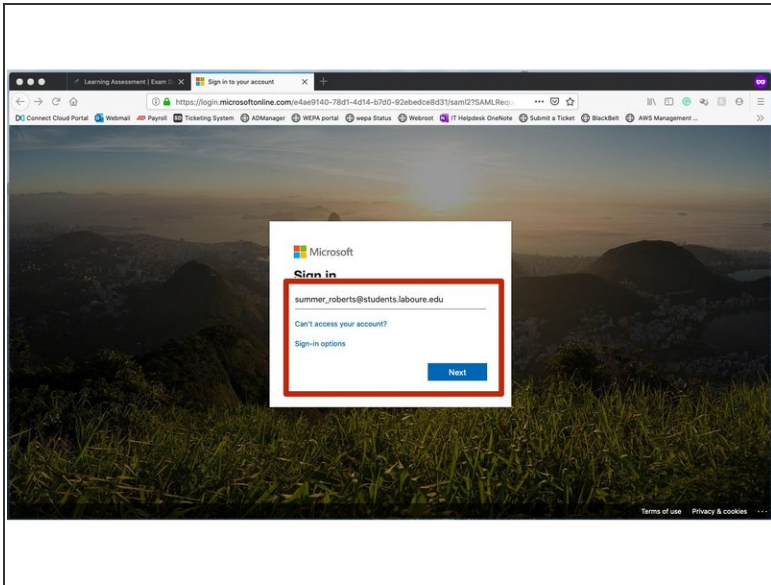

- In your web browser of choice, navigate to <http://Examssoft.com>
- Click on the **Login** button, and select **Student/Exam Taker** from the drop-down list

## Step 2

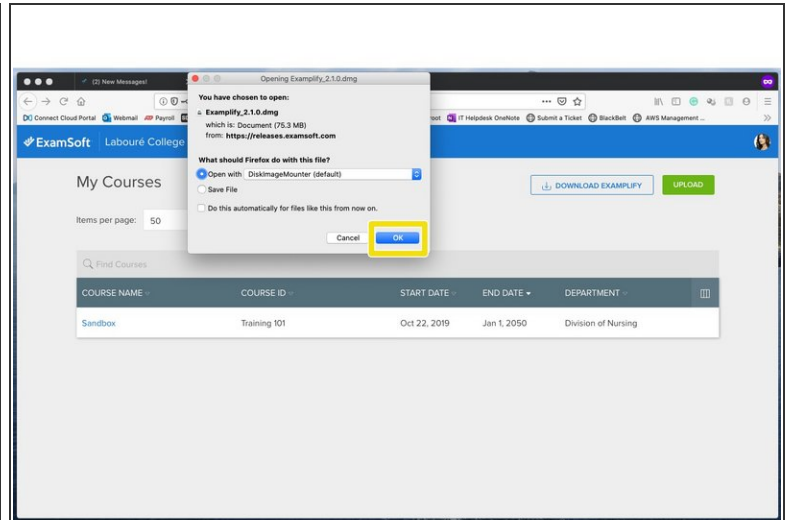

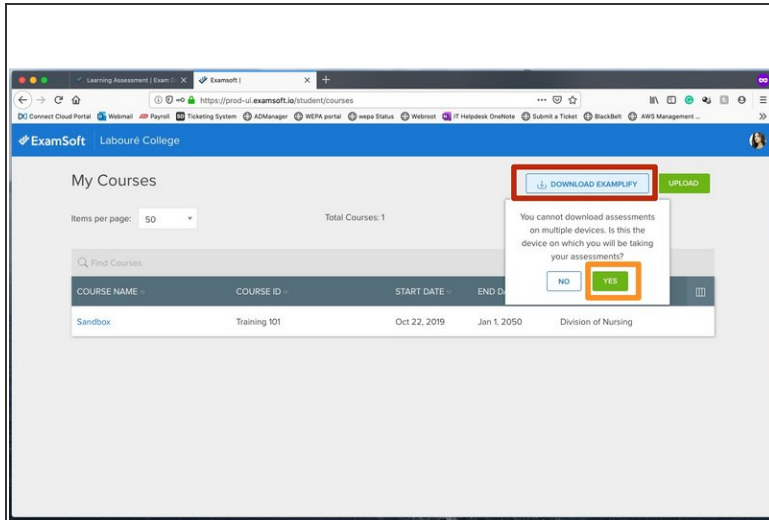

- Enter **Laboure College** in the **Institution** field
- Click **Login**
- Click **Login**

## Step 3

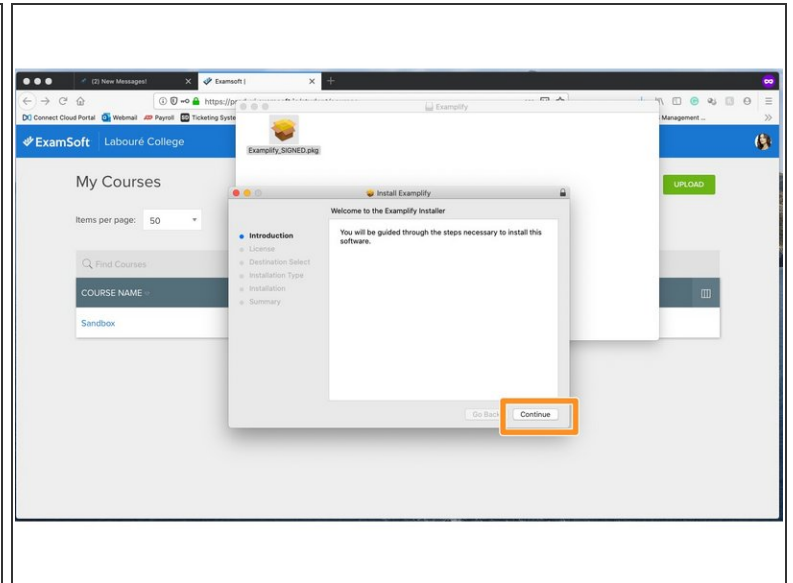

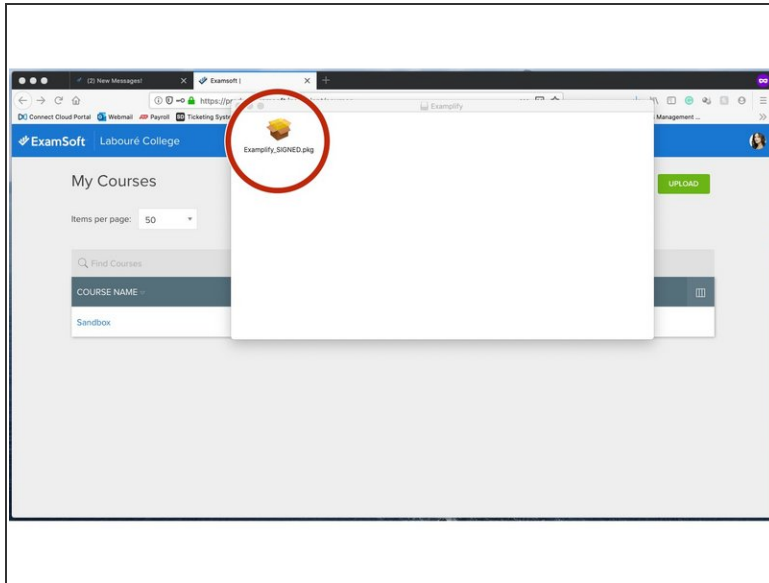

- Enter your full Labouré email address and click **Next**
- Enter the password for you Labouré email and click **Sign In**

## Step 4 — Download the Exemplify App

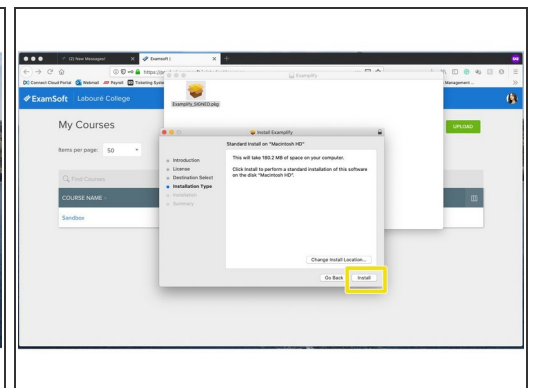

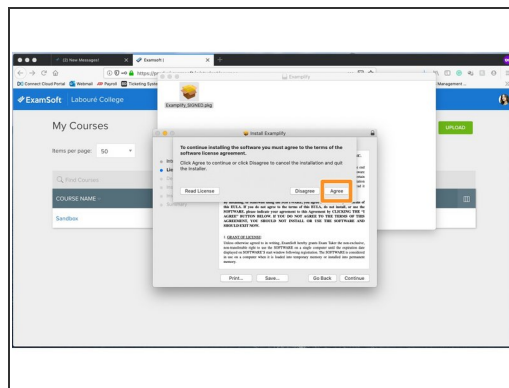

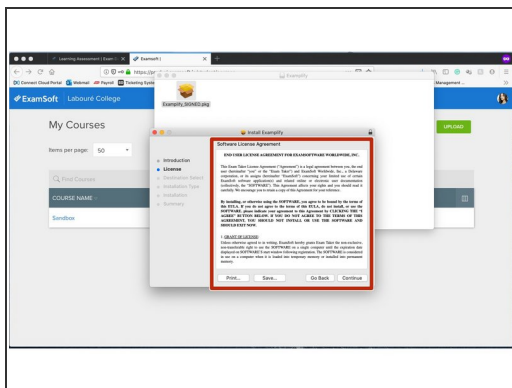

- Click **Download Exemplify**
- Click **Yes**
- Click **OK**

## Step 5 — Install Exemplify

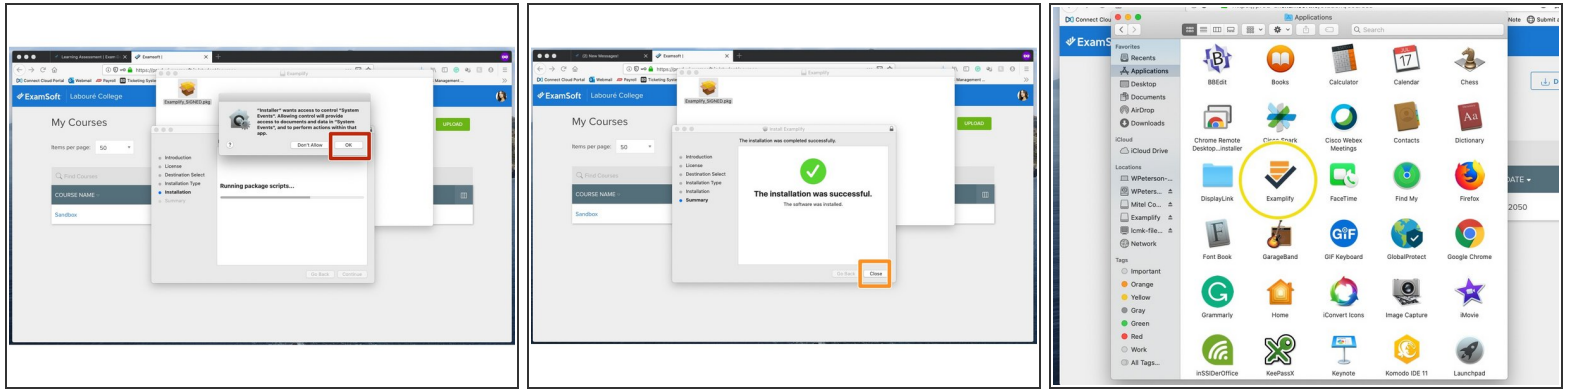

- Double-click on the installer to launch
- Click **Continue**

## Step 6

- Read the license terms of the program. When finished, click **Continue**
- Click **Agree**
- Click **Install**
- ⓘ At this point your computer may prompt you to enter you username and password to authenticate the install

## Step 7

- Click **OK**
- Click **Close**
- The Exemplify app will automatically launch when the installation is completed. It can also be found in your **Applications** folder.
