

Changing from Color Night Vision to Standard

Written By: Q-See

INTRODUCTION

In the event that the location where your color night vision cameras are mounted is too dark, and the night vision image is black, you will need to allow the cameras to switch into standard black and white night vision mode.

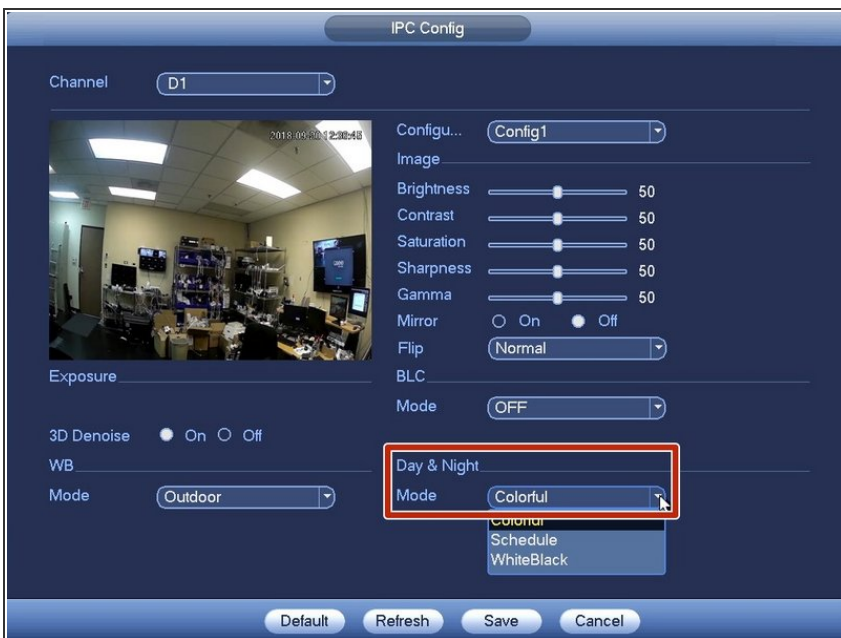

Step 1 — Changing from Color Night Vision to Standard

⚠ From the main screen while viewing the camera you wish to adjust, left click your mouse once for the menu bar to appear.

- Select the **Image** icon.

Step 2

- Click on the **Day & Night Mode** drop down.

i By default Colorful is selected for cameras supporting color night vision.

Step 3

- Select the color mode **Schedule**
- Click **Save**
