

# SCAN N' VIEW SETUP FOR IOS DEVICES

Written By: Q-See LT

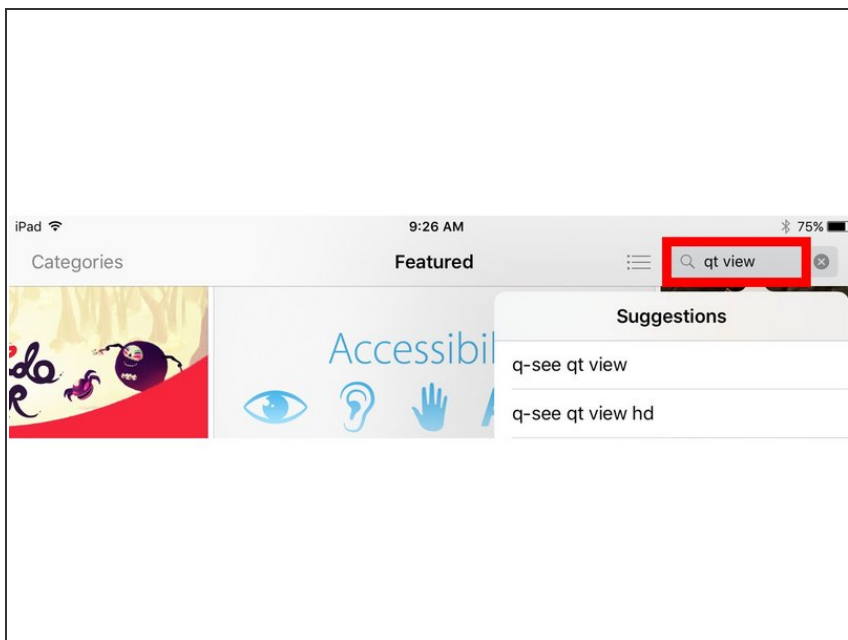

## Step 1 — SCAN N' VIEW SETUP FOR IOS DEVICES

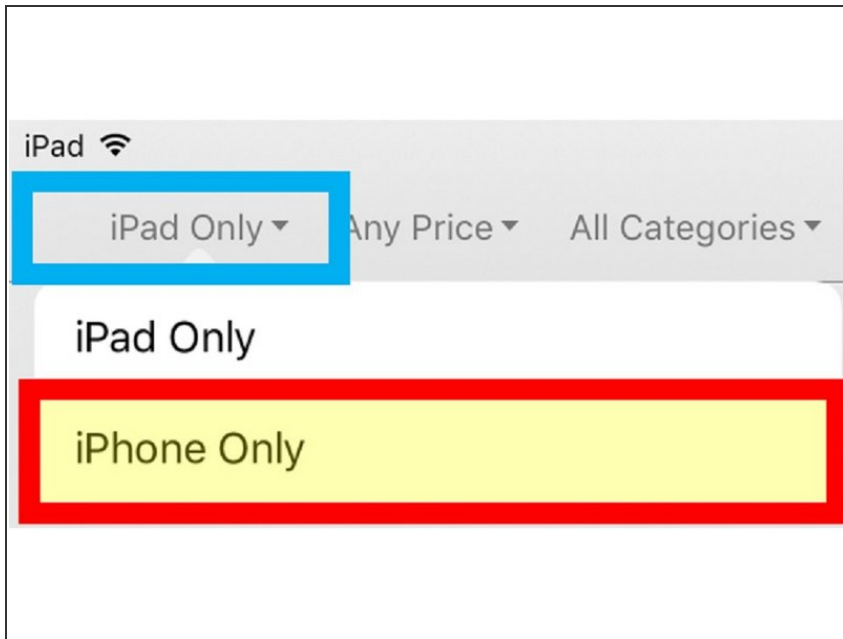

- Open the **App Store** from your iPhone or iPad.

## Step 2

- Search for **QT View**

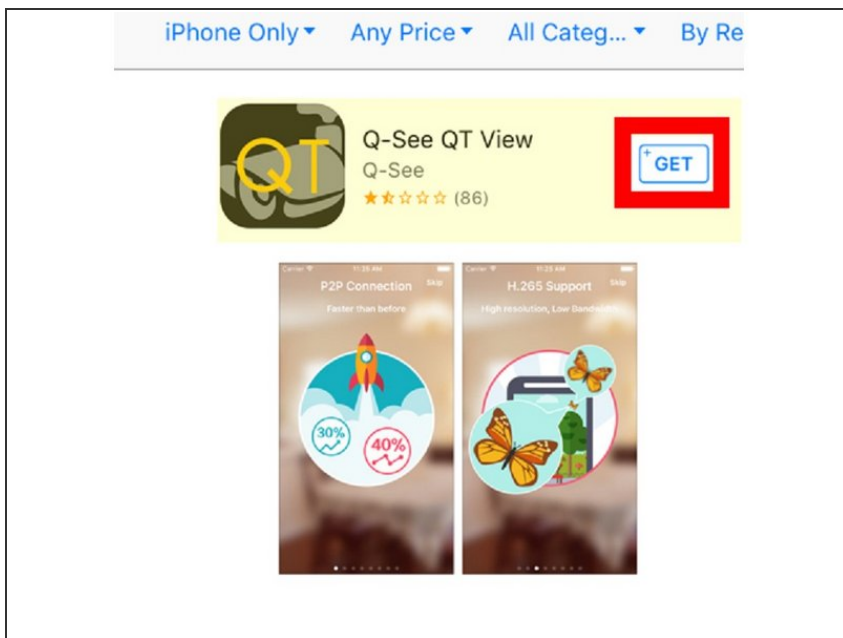

### Step 3

**⚠ If you are using an iPad you will need to modify the search.**

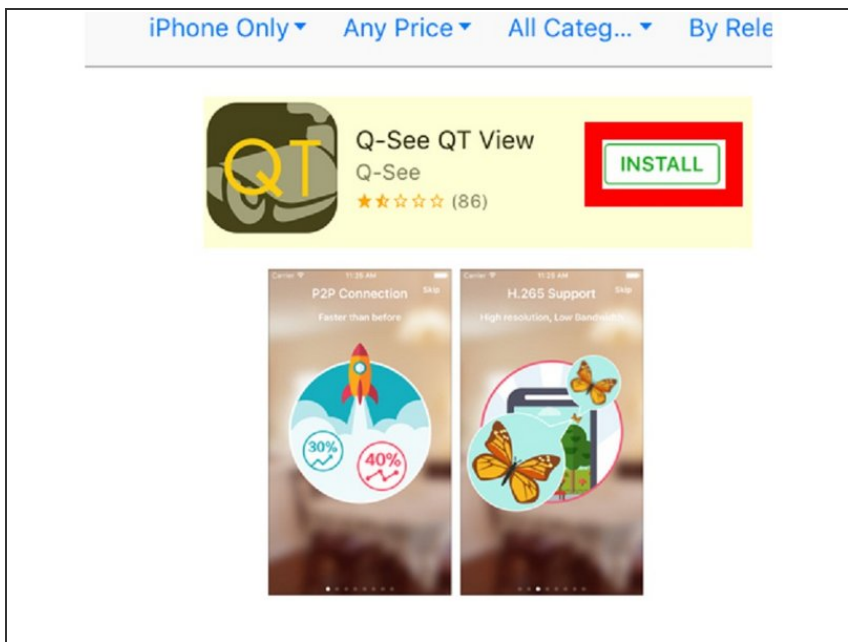

- Change the search from iPad Only to **iPhone Only**

### Step 4

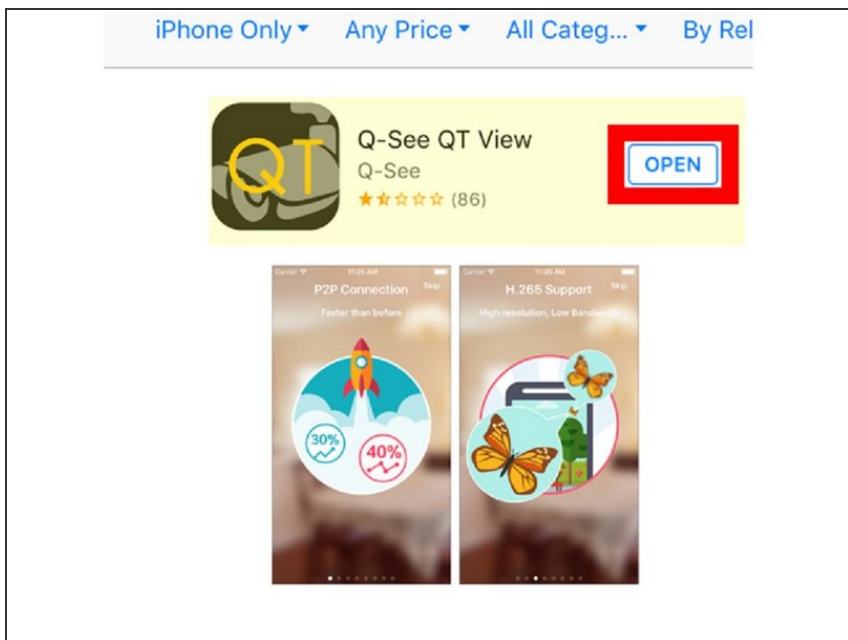

- Select **Get**

## Step 5

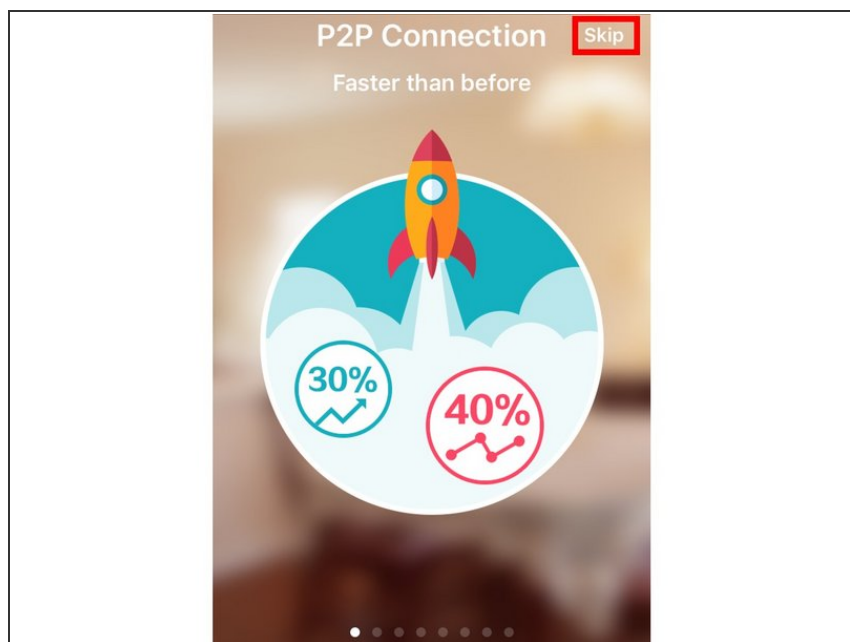

- Select **Install**

## Step 6

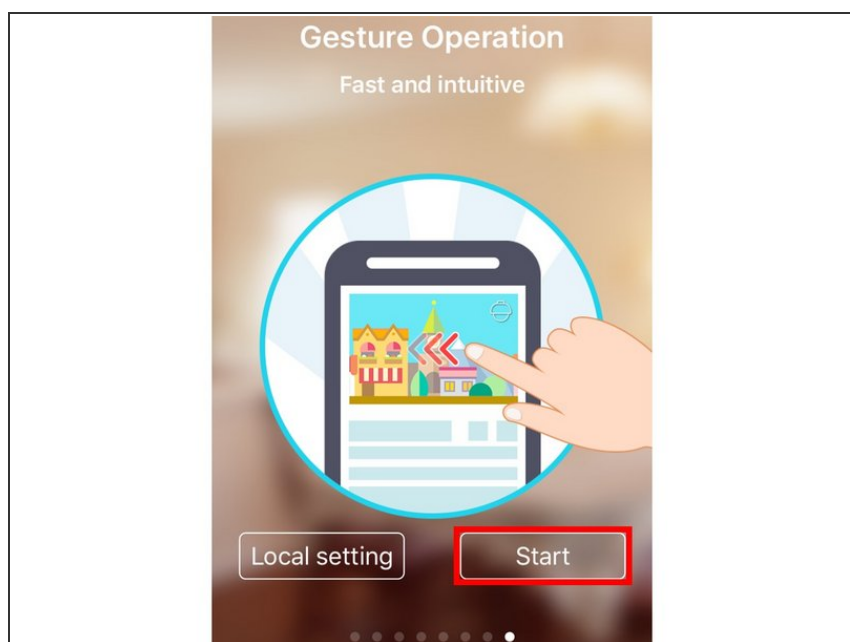

- Select **Open** once the installation is completed.

## Step 7

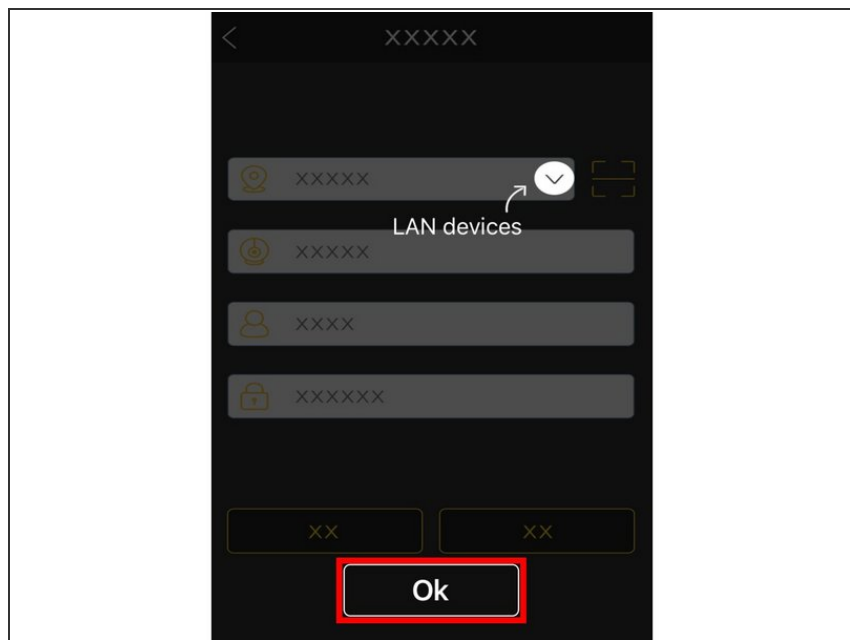

- Select **Skip** to bypass the demo screens.
- Alternatively you can proceed by swiping the screen to view each slide.

## Step 8

- Select **Start**

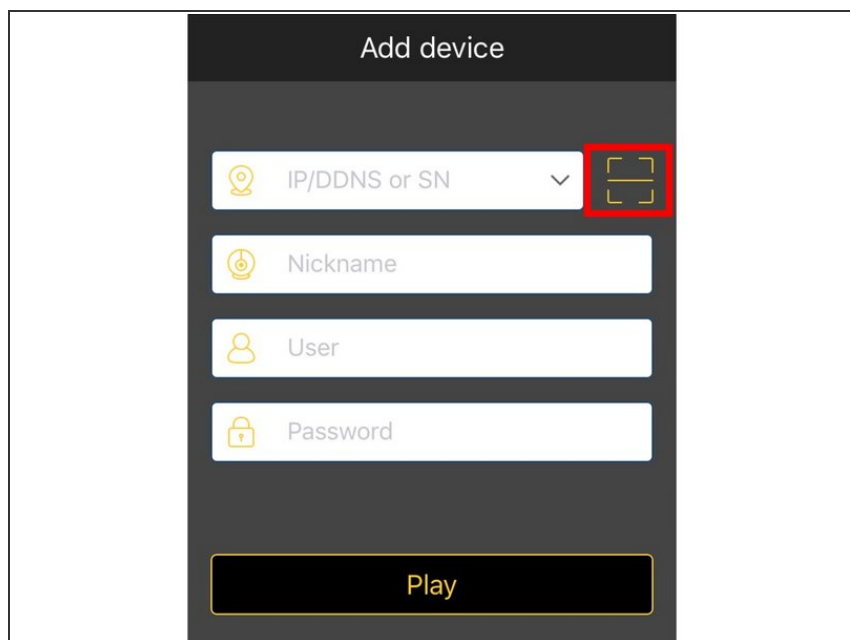

## Step 9

 **To add your recorder or camera to the app:**

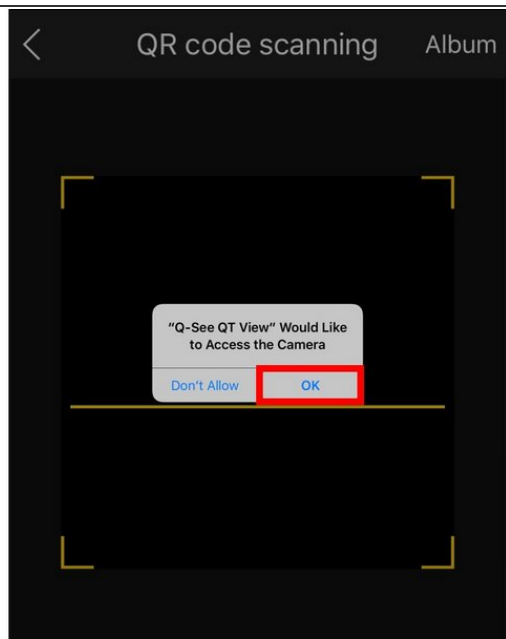

- Select **OK** to proceed.

## Step 10

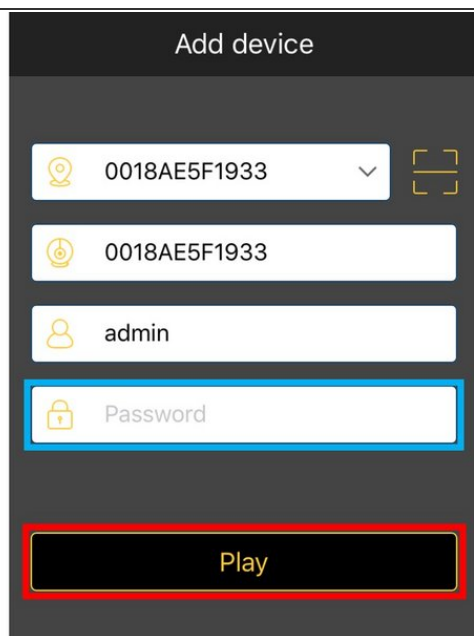

- Select the **QR Code Scanner** icon.

## Step 11

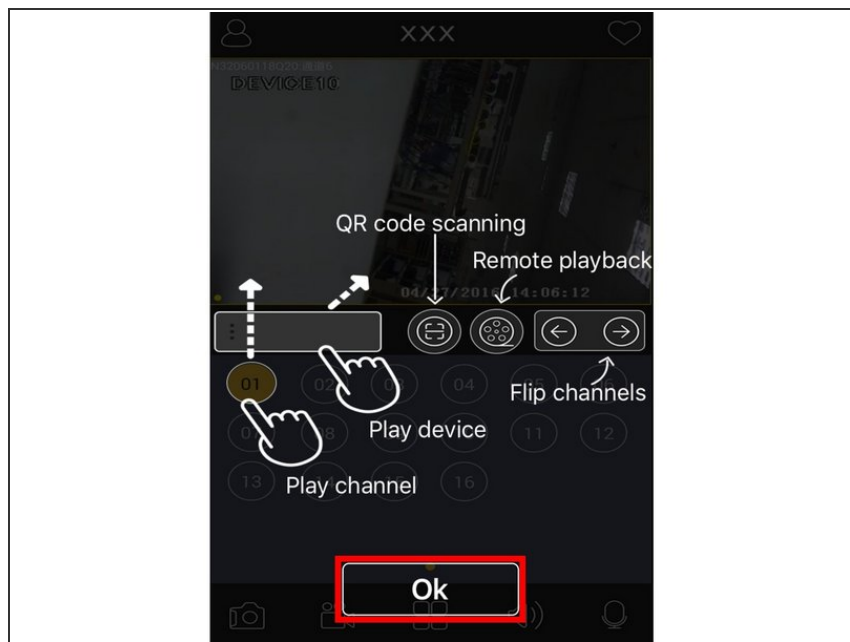

- i Your device may ask for permission to use the camera.
- Select **OK**
- ★ Scan the QR Code on the top panel of your system

## Step 12

- i The Serial Number, Nickname, and Username will auto populate.
- Enter the **Password** for you system.
- ★ **Default:** 123456
- Select **Play**

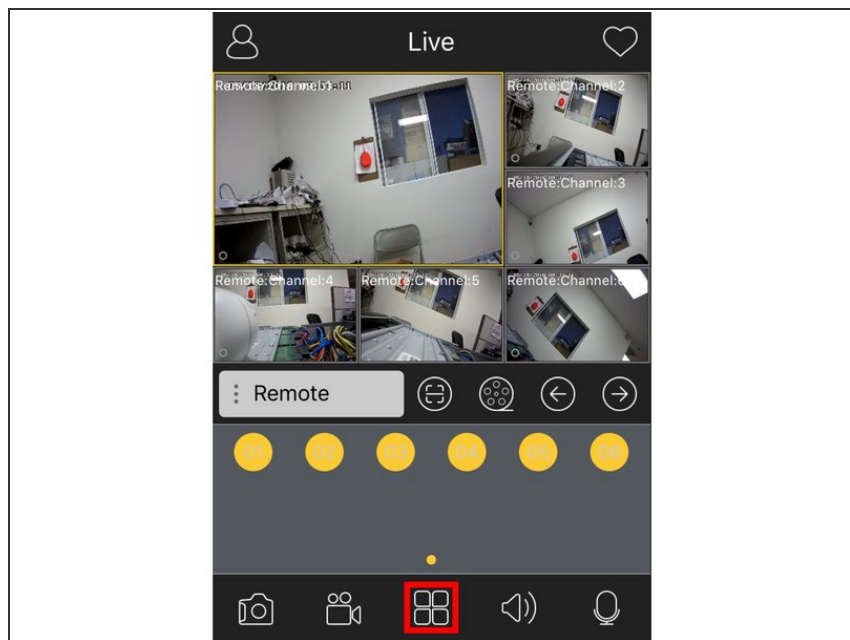

### Step 13

 Refer to the demo screen for an overview of the controls.

- Select OK

### Step 14

 To change the viewing mode:

- Select the **Viewing Mode** icon.

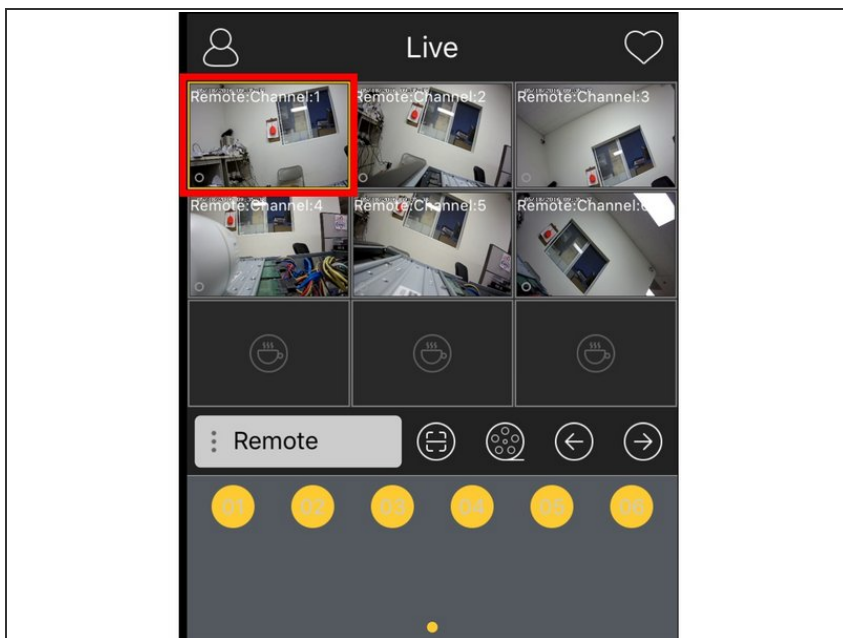

## Step 15

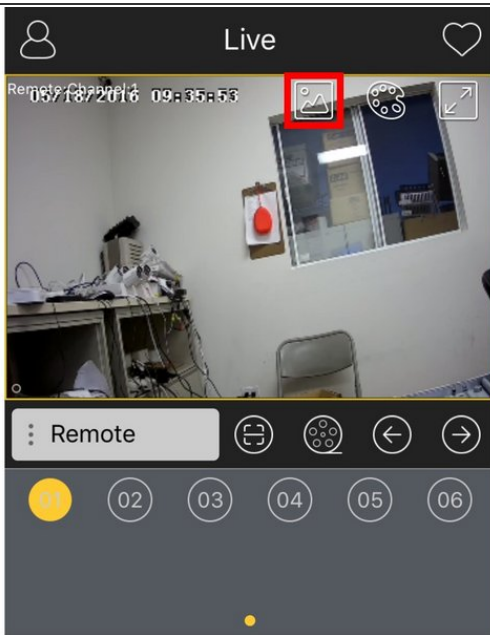

- Select to view **1x1, 2x2, 3x3, or 4x4**

## Step 16

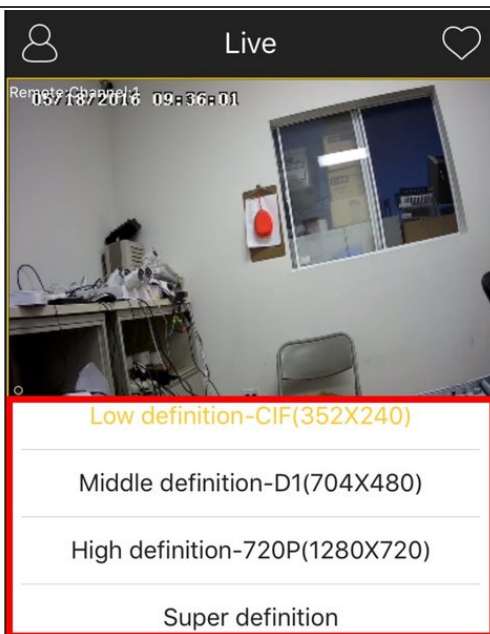

- Double tap a **Channel** to view 1x1.
- Rotate your device to view in full screen.

## Step 17

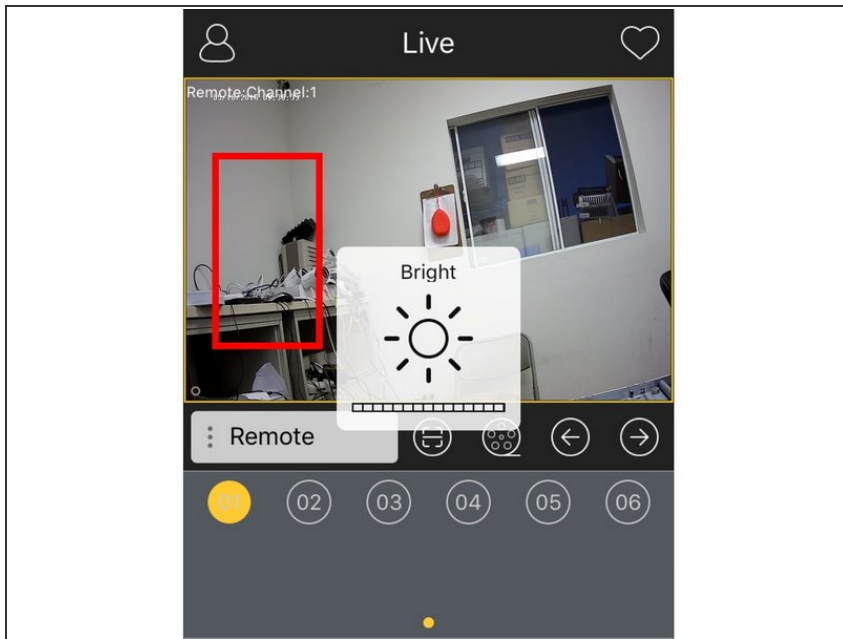

- Tap once on the image to reveal the **Quality icon**.

## Step 18

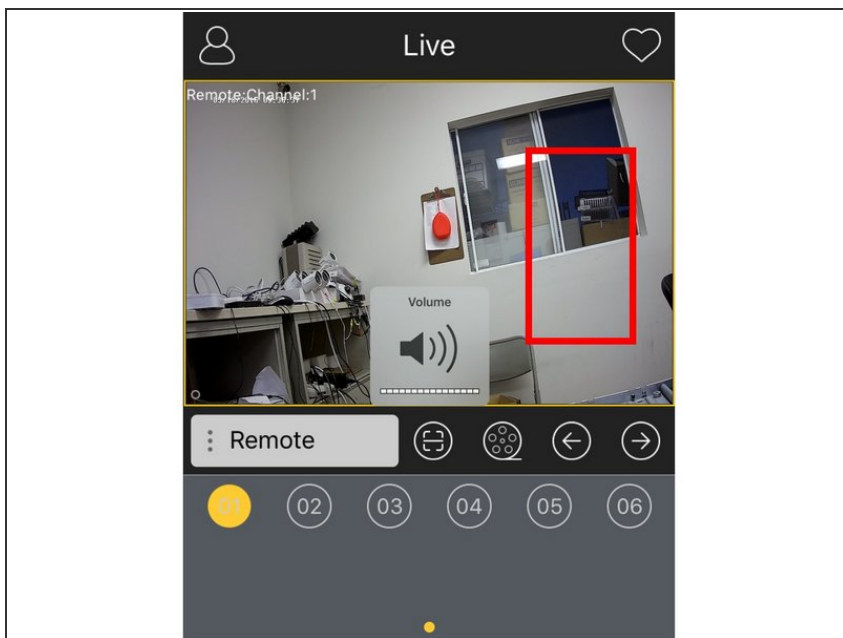

- Select the desired level of **Definition**.
- ⚠ Viewing your cameras at a higher definition will require a fast data connection, and will result in higher data usage.

## Step 19

- ★ To adjust the **Brightness** of your iPhone/iPad while viewing a camera:
  - Slide your finger **UP** or **Down** in the left portion of the image.

## Step 20

- ★ To adjust the **Volume** of your iPhone/iPad while viewing a camera:
  - Slide your finger **UP** or **Down** in the right portion of the image.
